Internet of Things Assignment

Assignment 3:
Write python code for blinking LED and Traffic lights for Raspberry pi. Only python code is enough, no need to execute in raspberry pi.
Note: you are allowed to use web search and complete the assignment.

Python code for blinking LED and Traffic lights for Raspberry pi:

```
import time
import RPi.GPIO as GPIO                    ## Used to import GPIO library
GPIO.setmode(GPIO.BOARD)                   ## Used to board pin numbering
GPIO.setup(11, GPIO.OUT)                   ## Used to setup GPIO Pin 11 to OUT
while True:
        GPIO.output(11,True)               ## Turns on Led
        time.sleep(1)                      ## Waits for one second
        GPIO.output(11,False)              ## Turns off Led
        time.sleep(1)                      ## Waits for one second
```
